

One Dogmatic Paradigm: Do Credentialing Programs Work?

Presented at the 2012 American Evaluation Association
Annual Conference

27 October 2012

Hosted by:

Manny Straehle, Ph.D

Rory McCorkle, MBA, Ph.D.

Brown Bag Idea Exchange Session Expectations

Us	You
1. Welcome attendees	2. Introduce yourselves
4. Pose thought provoking questions or challenge	3. Note your interest in the topic
6. No formal presentation	5. Respond to questions or challenge

Background

- * What is the current credentialing paradigm?
- * How did it evolve?

Questions

- * How is the system of credentialing a dogmatic paradigm?
- * Has our way of testing competency using methods of identifying and testing knowledge, skills, abilities failed us? What is the evidence? Examples?
 - * If it has failed, how can we address it?
- * What will be the conditions for a new paradigm to emerge in testing individual competency?
 - * Is there a pre-paradigm in testing (those methods that may be valid and competitive but not receiving the consensus among the scientists)? And do they offer a breakthrough for the field?

Follow-Up

- * Exchange Information
 - * Host Information
